

Checkly — User Acceptance Testing Survey

Draft v1 — Survey Instrument

Note to the Team

Delete this section before sending the survey out.

1. Fill in the placeholders in brackets (app link, test account / sample PDF, deadline, contact email).
2. Decide on a sending format: paste the questions into Google Forms / Typeform, or send this document as a fillable PDF.
3. Aim for **at least 5 participants** who plausibly match our target user (someone who does recurring inspections, audits, QA checks, or checklist-based work — e.g. a safety officer, facility/maintenance technician, QA engineer, or site supervisor). A less perfect proxy, such as a teammate or another student, is acceptable as a backup but should be noted as such in the report.
4. Everything from the next section onward is what participants actually see.

Introduction

Thank you for taking the time to try out **Checkly**!

Checkly is an AI-assisted checklist tool: you design a checklist (e.g. a safety inspection, equipment check, or quality audit), optionally attach reference documents (PDFs) for context, and then fill it out — verifying items with photos and an AI assistant that can help you build and check off the form by chatting with it.

We are building this as part of a university project and would love your honest feedback — including the negative kind. It helps us much more than compliments.

Time required: approximately 15–20 minutes.

What you'll do: try a few core tasks in the app, then answer some short questions.

Privacy: your responses will only be used for this course project's evaluation. You can skip your name/email if you prefer to stay anonymous.

App link: [INSERT LINK]

Test account / login (if needed): [INSERT CREDENTIALS]

Sample PDF to upload during the task (if you don't have your own): [INSERT LINK TO SAMPLE PDF, e.g. a short safety-guideline or manual]

Please complete this by: [INSERT DEADLINE]

If you get stuck or something breaks, please note it down anyway in the feedback section — that is valuable too.

Part 1 — About You

1. Name (*optional*) _____
2. Email (*optional — only if you're open to a short follow-up question*)

3. What is your current role / occupation? _____
4. Does your work or studies involve recurring inspections, audits, quality checks, or checklist-based tasks (e.g. safety inspections, equipment/maintenance checks, site audits, QA checklists)?
☐ Yes ☐ No
5. If yes, briefly describe what kind: _____
6. What do you currently use to manage these checklists/inspections?
☐ Paper forms
☐ Excel / Google Sheets
☐ Word / PDF templates
☐ Dedicated inspection software (please name it: _____)
☐ Nothing formal
☐ Other: _____
7. How comfortable are you with learning new software/apps in general?

1 2 3 4 5
☐ ☐ ☐ ☐ ☐

(1 = Not comfortable, 5 = Very comfortable)

Part 2 — Try Checkly

Please complete these steps in order. Don't worry about doing it "perfectly" — we want to see how it feels for a first-time user.

1. **Sign up / log in** at [INSERT LINK].
2. **Create a new checklist** — give it a title and description (e.g. "Safety inspection — Warehouse A").
3. **Upload a PDF as context** for the checklist (use the sample PDF above, or one of your own, e.g. a guideline/manual).
4. **Build out the checklist**: add at least one section, and a mix of item types (e.g. a checkbox, a text field, and a photo-check item).
5. **Open the AI Assistant** and ask it to do at least one thing for you — e.g. "Add a section for fire safety with two checkbox items" or "What does this checklist cover?"
6. **Run through the checklist** as if performing the inspection: check off a few items, fill in a text field, and upload at least one photo as evidence.
7. **Go to the dashboard** and check your progress / stats for the checklist you created.
8. **Export the checklist to PDF** using the "Create PDF" option.

Part 3 — Evaluation

Rate each statement from 1 (Strongly disagree) to 5 (Strongly agree).

3.1 First impression & onboarding

Statement	1	2	3	4	5
It was easy to understand what Checkly does within the first minute.	☐	☐	☐	☐	☐
I knew what to do without needing outside instructions.	☐	☐	☐	☐	☐
The interface felt clear and uncluttered.	☐	☐	☐	☐	☐

3.2 Creating a checklist & PDF context

Statement	1	2	3	4	5
Creating a new checklist was straightforward.	☐	☐	☐	☐	☐
Attaching a PDF as context felt useful, not just an extra step.	☐	☐	☐	☐	☐
Adding sections and different item types (checkbox, text, photo, etc.) was intuitive.	☐	☐	☐	☐	☐

3.3 AI Assistant

Statement	1	2	3	4	5
The AI Assistant understood what I asked it to do.	☐	☐	☐	☐	☐
The changes the AI made matched what I expected.	☐	☐	☐	☐	☐
I trusted the AI Assistant's changes to my checklist.	☐	☐	☐	☐	☐
The AI Assistant saved me time compared to doing it manually.	☐	☐	☐	☐	☐

3.4 Photo verification

Statement	1	2	3	4	5
Uploading a photo as proof for a checklist item was easy.	☐	☐	☐	☐	☐
I see clear value in photo verification for real inspections.	☐	☐	☐	☐	☐

3.5 Dashboard & progress tracking

Statement	1	2	3	4	5
The dashboard gave me a clear sense of progress/status.	☐	☐	☐	☐	☐
The PDF export would be useful for sharing/reporting results.	☐	☐	☐	☐	☐

3.6 Overall

Statement	1	2	3	4	5
Checkly would solve a real problem I (or someone in my field) have today.	☐	☐	☐	☐	☐
I would consider using Checkly (or recommending it) for real inspection/checklist work.	☐	☐	☐	☐	☐
Overall, I am satisfied with my experience using Checkly.	☐	☐	☐	☐	☐

Likelihood to recommend

On a scale of 0–10, how likely are you to recommend Checkly to a colleague who does this kind of work?

0	1	2	3	4	5	6	7	8	9	10
☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐

Part 4 — Open Feedback

1. What did you like most about Checkly?
2. What was confusing, slow, or didn't work as you expected?
3. If you could change or add one thing, what would it be?
4. Is there a feature you expected to find but didn't?
5. Any other comments?

Closing

Thank you so much for your time — this directly shapes what we build next!
